4.0	Why we carry Such an Extensive Parts Department		
4.1	List of Our Major Accessory Vendors		
4.2	Pump Manufacturers		
4.3	Engine Manufacturers		
4.4	Motor Manufacturers		
4.5	Chemicals		

4.0 Why we carry Such an Extensive Parts Department

It's a simple formula:

You Save Time And Money When You Can Get The Parts
You Need, As Soon As You Need Them.

Give Us A Call - Chances Are We Have The Parts You Need In Stock.

SAFETY PLUS QUALITY ENGINEERING for Replacement Parts

There can always be the episode when an injury can occur because the replacement parts were not designed for the cleaning equipment.

Something as simple as quick connects where there is an insulated quick connect for hot water machines and not for cold water.

Putting on the correctly rated gallon per minute temperature and working pressure trigger gun for the designed equipment.

Pressure hose; there is the right hose and the wrong.
Don't use the wrong, call us first.

Is your safety relief valve plugged with calcium and rust?
Do you have the correct unloader regulator?
Is there a by-pass temperature safety valve?

**Remember --- when something in the safety system goes out,
there is always a reason!
Find the reason!**

**The emergency room is expensive - preventative maintenance is NOT,
Your Family deserves to have you around healthy!**

4.1 Major Accessory Vendors

We sell, service and maintain all these national brands.
